INVESTMENT PROCESS

The Fund identifies companies that are believed to have sustainable competitive advantages allowing them to produce free cash flow and earn superior cash returns on capital. The Fund seeks to invest in businesses that are run by ethical, capable, stockholder-oriented management teams that also are good operators and, very importantly, understand the importance of capital allocation. The Fund then focuses its analysis on the difference between price and value; that is, the difference between the price of the company's securities and the appraised value of the securities. The greater the difference of value over price, the larger the margin of safety and the more attractive the investment. The Fund will generally invest larger amounts of its assets in companies determined to have lower price to value ratios and reduce capital committed to companies determined to have higher price to value ratios.

INVESTMENT STRATEGY

The Fund seeks to achieve long-term capital appreciation by investing primarily in small-capitalization U.S. companies believed to be both undervalued and possessing a sustainable competitive advantage.

You should consider the fund's investment objectives, risks, charges, and expenses carefully before you invest. Information about these and other important subjects is in the fund's prospectus, which you should read carefully before investing.

VULCAN
VALUE
PARTNERS

Disclaimer Page

† Vulcan Value Partners, LLC (“Vulcan” or the “Adviser”) has contractually agreed to limit the Fund’s total annual fund operating expenses (exclusive of Acquired Fund Fees and Expenses, brokerage expenses, interest expense, taxes and extraordinary expenses) to 1.25% of the Fund’s average daily net assets. This agreement is in effect through August 31, 2015. If the Adviser foregoes any fees and/or reimburses the Fund pursuant to this letter agreement with respect to a particular fiscal year, then the Adviser shall be entitled to recover from the Fund the amount foregone or reimbursed to the extent Fund’s expenses in later periods fall below the annual rates set forth in the relevant agreement. The Adviser may not discontinue this waiver without the approval by the Fund’s Board of Trustees. The fund imposes a 2.00% redemption fee on shares held less than 90 days. Performance shown does not include the redemption fee, which if reflected would reduce the performance quoted.

Risks:

•It is possible that each Fund may invest in securities offered in certain types of transactions (such as private placements) that, because of that Fund’s size, may have a disproportionate impact on that Fund’s performance results. The Fund would not necessarily have achieved the same performance results if its aggregate net assets had been greater.

•The Fund may invest in the securities of companies with small or medium market capitalizations. Small or medium-sized companies may have more limited product lines, markets, and financial resources than larger companies. In addition, their securities may trade less frequently and in more limited volume than those of larger companies. Small- or mid-cap stocks may be more volatile than those of larger companies and, where trading volume is thin, the ability to dispose of such securities may be more limited. Because the Vulcan Value Partners Small Cap Fund normally invests at least 80% of its equity assets in securities of smaller companies, these risks may be increased.

•Stock markets, especially foreign markets, are volatile and can decline significantly in response to adverse issuer, political, regulatory, market or economic developments. Value stocks can perform differently from the market as a whole. They can remain undervalued by the market for long periods of time.

Definitions:

Alpha - a measure of the difference between a fund’s actual returns and its expected performance, given its level of risk as measured by beta

Beta – a measure of the volatility of a security or a portfolio in comparison to the market as a whole

Upside Capture Ratio - measures whether a given fund has outperformed—gained more than—a broad market benchmark during periods of market strength, and if so, by how much

Downside Capture Ratio - measures whether a given fund has outperformed—lost less than—a broad market benchmark during periods of market weakness, and if so, by how much

Standard Deviation - depicts how widely an investment’s returns varied over a certain period of time

Sharpe Ratio - used to determine reward per unit of risk

R-squared - a measure of the correlation of the portfolio’s returns to the benchmark returns

Market Capitalization (market cap) - the total equity market value of a company, it is equal to shares outstanding times the stock price

Median Market Cap - the mid-point of the companies’ market caps included in the portfolio

Average Market Cap - the average of the companies’ market caps included in the portfolio

Turnover -how frequently assets within a portfolio are bought and sold

Name Turnover - the number of companies bought plus the number of companies sold divided by 2 and then divided by the average number of companies in the portfolio

Dividend Yield - how much a company pays out in dividends each year relative to its share price

Return on Equity (ROE) - measures a corporation’s profitability by revealing how much profit a company generates with the money shareholders have invested

Price to Earnings Ratio - a calculation that compares the company’s stock price to the company’s earnings per share

Price to Book Ratio - a calculation that compares a company’s stock price to the company’s book value

Price to Sales Ratio - compares a company’s current stock price to its revenue per share

The Russell 2000 Index includes the 2000 firms from the Russell 3000 Index with the smallest market capitalizations. The Russell 2000 Index figures do not reflect any fees, expenses, or taxes. Investors cannot invest directly in this index. The Russell 2000® Value Index measures the performance of those Russell 2000® companies with lower price-to-book ratios and lower forecasted growth values. The Russell 2000 Value Index figures do not reflect any fees, expenses, or taxes. Investors cannot invest directly in this index.

* Investment performance reflects fee waivers and in the absence of waivers returns would be reduced and ratings may have been lower. For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund’s monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.) The Overall Morningstar Rating for a fund is derived from a weighted average of the performance figures associated with its three-, five- and ten-year (if applicable) Morningstar Rating metrics, as of June 30, 2015. Morningstar Rating is for the retail share class only; other classes may have different performance characteristics. © 2015 Morningstar, Inc. All Rights Reserved.
